

80% onboarding dropout — FIXED: 3-step onboarding now live (b9a805b)
Previous 6-step flow dropped 16/20 signups before first lesson. New POPIA-compliant 3-step flow + auto-launch deployed today. Monitor this week.

Health Check passing for first time · Vercel production READY
25s polling loop fixed the splash-screen false-failure. All app checks green. 3-step onboarding, username system, POPIA consent live on www.fundiapp.co.za.

DEPARTMENT BRIEFING — CEO + ALL HEADS

**CEO: The product works. The problem is discovery → activation.**

Once users reach lesson 1, 75% complete it and keep going — proof the core loop is solid. The entire growth problem is in the 80% who never get past signup. 3-step onboarding shipped today is the highest-leverage thing we've done. Your D+1 retention play (push notification) is the next unlocking move. Then referrals.

PRODUCT

Onboarding & Activation

P1 — This Week

→ Monitor onboarding conversion rate daily — target 60%+ by Apr 29

→ Add D+1 push notification: "Your streak is waiting — come back and earn 50 XP"

→ Trigger lesson-5 milestone email: "You're in the top 10% of South African savers"

→ Auto-suggest username for existing users without one (block the modal blocker)

RETENTION

Habit Loop Engineering

P1 — This Week

→ All 4 active users have streak ≤ 1 — the habit loop isn't firing. Fix streak notifications first

→ Anonymous "binge user" did 5 lessons + 5 perfect scores in 1 session, never returned — needs D+1 email/push immediately

→ Add "Streak freeze" visibility in app — users don't know they have protection

→ Weekly Sunday "recap" notification: "Your week in review — here's what you learned"

GROWTH

Referral & Word of Mouth

P2 — Next 2 Weeks

→ 17 of 20 signups came organically in 14 days — someone is sharing. Build that funnel

→ Add "Share achievement" card at lesson completion: pre-formatted WhatsApp/Instagram share

→ Referral link: "Invite a friend — both get 100 bonus XP"

→ Add social proof to landing page: "Join 20 South Africans building financial freedom"

CONTENT

Content Depth & Volume

P2 — Next 2 Weeks

→ "doctor" has completed 25 lessons — check if they're near content exhaustion; add 10+ lessons immediately

→ 5 perfect scores in first session from new user = content is accessible but may be too easy — add harder tiers

→ Add South Africa-specific modules: SARS tax brackets, TFSA, retirement annuities, medical aid

→ Add video/audio option for Zulu/Xhosa/Sotho speakers (accessibility + massive TAM expansion)

ENGINEERING

Infrastructure & Quality

P2 — Ongoing

→ Health Check now green ✓ — maintain with current 25s polling loop

→ E2E tests running on 3 browsers — monitor results and fix any failures immediately

→ Add PostHog funnel tracking: measure exact step where onboarding drops

→ pageViews.tsx is 7,659 lines — split into components for maintainability (ongoing)

LEGAL

POPIA & Compliance

P3 — Verified

→ 3-step onboarding: all 3 consent checkboxes unticked by default ✓

→ POPIA Section 11 explicit consent wording live ✓

→ 18+ age gate required checkbox live ✓

→ Privacy policy page exists — verify it's complete and legally reviewed before 100+ users

ACTION PLAN — NEXT 7 DAYS

#	ACTION	OWNER	EXPECTED IMPACT	STATUS
1	Monitor 3-step onboarding conversion	Product	20% → 60%+ activation	Live Today

#	ACTION	OWNER	EXPECTED IMPACT	STATUS
2	D+1 push notification for non-returning users	Engineering	Recover binge-and-churn users	This Week
3	Streak day-1 reminder notification	Engineering	Lift streak=1 to streak=3+	This Week
4	Add 10 new lesson cards	Content	Prevent "doctor" from churning	Urgent
5	WhatsApp share card at lesson completion	Growth	Unlock organic referral loop	Queued
6	PostHog funnel events at each onboarding step	Analytics	Pinpoint remaining drop-off	Queued
